Abstract (en)

[origin: WO2017174901A1] The subject matter of the present invention is an electrical device (10) of circuit breaker type comprising a contact holder (100) including a first mechanical link (101) mechanically linking a first contact element (42) to the contact holder, a second mechanical link mechanically linking a third contact element (63) to the contact holder (100) and a third mechanical link (103) mechanically linking the contact holder (100) to a housing for the electrical device, the contact holder (100) allowing the first contact element (42) and the third contact element to move relative to the housing.
