Abstract (en)
[origin: WO2015001237A2] The present application is directed to a section (2) for a primary framework, a spacer (3) for a secondary framework, and a wall structure comprising a grid formed of a primary framework of sections (2) and a secondary framework of spacers (3). The section (2) comprises a web (200) having at its base a bottom flange (202) forming a support that comprises at least one sub-flange (203) of which a first face (209) or the web (200) comprises at least one tongue (206, 206', 206'') forming an abutment against movement in translation, and the spacer (3) includes a lateral passage (302) at one end (301) configured to receive the tongue (206, 206', 206'') of the section (2) and a cutout (303) configured to cooperate with a lip (204) of a sub-flange (203) of a section (2) forming a means for guiding movement in translation. If necessary, two consecutive sections (2) are joined by an appropriate fishplate.
