Abstract (en)

The invention relates to a swimming pool cover system, comprising a planar cover element, a holder for retractably accommodating the cover element and a drive connected to the holder for deploying and/or retracting the cover element from and in or on the holder, respectively, characterized by a cassette, to which at least the holder is mounted, wherein the cassette is to be deployed at a swimming pool in a pre-assembled state separate from the swimming swimming pool, with at least the holder mounted to the cassette.
