Abstract (en)

[origin: WO2016189242A1] The invention relates to a portable safety device (100) capable of inflating multiple envelopes comprising at least one intake of surrounding air (1), at least one inflation means, at least one enriched gas or air area, at least one check valve (2), and at least one coupling (3) connected to at least one inflatable envelope (4), characterised in that it comprises at least one separating wall (8), which compartmentalises at least the end of at least one acceleration cone (3) leading into at least two inflatable envelopes (4) which are substantially hermetically separate.
