Abstract (en)

[origin: WO2016187637A1] The invention relates to a bending tool (1) for a press brake (10), comprising a preferably adjustable forming portion (2) for forming a workpiece (15), characterized in that the bending tool (1) includes at least one drive (8, 28, 34, 38), said drive (8, 28, 34, 38) preferably being arranged inside the bending tool (1). The invention also relates to a press brake and to a method for manipulating a bending tool.
