Abstract (en)
[origin: US2016347522A1] A carton for holding a plurality of containers. The carton has a plurality of panels for at least partially forming an interior of the carton. The plurality of panels includes at least one top panel comprising a handle portion and a retention portion. The handle portion is foldably connected to the retention portion and at least partially forms a handle of the carton. The retention portion has openings for respectively receiving the necks of the containers when the containers are in the carton. The retention portion has at least one reinforcing flap for reinforcing and stabilizing the carton when the handle is activated.
