Abstract (en)
[origin: US2016360256A1] The present disclosure generally relates to user interfaces for recording and playing audio and video. In one example, a first application requests a second application to initiate recording one or more data streams of the first application. The second application displays a confirmation affordance. In response to detecting activation of the confirmation affordance, the second application initiates a recording of at least one of the data stream of the first application.
