Abstract (en)

The present invention relates to an elastic bracket for supporting a pumping member (9) of a hermetic compressor. The elastic bracket (10) comprises an elastically deformable elongated arched portion (11) and a supporting and centering member (14) formed by a stem having at least two opposed flat faces which extends from a central region of the elongated arched portion (11) along an axis essentially perpendicular. The supporting and centering member (14) is adapted to accommodate and support the pumping member (9) in a freely axially sliding manner.
