Abstract (en)

[origin: WO2016200255A1] The present invention relates to a tray (20) for holding cigarette parts (34) for electronic cigarettes, an unloading device (16) for unloading the cigarette parts (34) from the tray (20) and the combination of a tray (20) and an unloading device (16). The tray (20) comprises a front wall, which is movable from a closed position to an open position in order to create an access opening for filling the tray (20) with cigarette parts (34), and wherein the bottom wall (28) is movable from a closed position to an open position in order to create a discharge opening (35) for unloading the cigarette parts (34) from the tray (20) under the influence of gravity. The unloading device comprises a tray holder (15), a receiving opening (14), a reservoir (38) and a discharge unit (40) for discharging the cigarette parts (34) from the reservoir (38).
