Abstract (en)  
[origin: WO2016197163A1] The invention relates to an ejection device (1) for a movable furniture part (2), comprising an ejection element (4) that can rotate about a rotational axis (X) and ejects the movable furniture part (2) from a closed position (SS) into an open position (OS), an ejection force storage element (5) which applies a force to the ejection element (4), and a locking device (17) for locking the ejection element (4) in a locking position (VS), the line of application (W) of the ejection force storage element (5) running through the axis of rotation (X) when in said locking position (VS).
