Abstract (en)
[origin: WO2016200261A1] The present invention is directed to a method for installing an elongated member or an assembly thereof, comprising the steps of: - providing an elongated member that comprises a peripheral wall and an inner space that extends in the longitudinal direction of said elongated member; - arranging said elongated member into or on a soil; - arranging a floatable member inside the inner space of said elongated member or assembly; - displacing said floatable member by providing and/or regulating liquid inside the inner space of the elongated member or assembly; and - bringing said floatable member in an engaged state with the elongated member or assembly when the liquid level inside said inner space has displaced said floatable member to a desired level. The invention further relates to a support comprising an elongated member or an assembly thereof.
