Abstract (en)

[origin: WO2017016786A1] The invention relates to a closure for a window or door comprising a base designed for fixing to the frame or to the leaf and a closure element mounted on the base. Arranged on the base is a motor, which can be drivably coupled to at least one fixing element movably mounted on the base and which, during the assembly of the closure, is capable of moving the fixing element into a fixing position, in which the base is fixed to the frame or to the leaf.
