Abstract (en)

[origin: WO2017021132A1] The invention relates to a surge arrester with multiple columns (11, 12, 13) of resistors (14, 15, 16, 17), wherein the columns (11, 12, 13) are secured at one end by means of a retaining device (19). The invention is characterized in that at least one column (11, 12, 13) has an increased support point (8, 9, 10) at the one end in order to form a point of support for the at least one column (11, 12, 13) by means of the retaining device (19). The invention further relates to a method for assembling a surge arrester.
