Abstract (en)

[origin: WO2016199077A1] The invention relates to a device for electrical connection between an electric motor and a supply unit of said motor, in particular for automotive vehicle compressor, said device comprising a connection plug (62) formed from flexible sheet metal configured to permit blind mounting of the motor on the supply unit with mechanical contact and electrical connection between said connection plug (62) and a connector (52) of said supply unit.
