Abstract (en)
[origin: WO2016204667A1] A safety spring aggregate for mounting at a vehicle seat comprises one or more tensions springs and one or more spring back resistors. The safety spring aggregate permits reversible extension up to a given load and irreversible extension in excess of the given load. When extended in excess of the given load spring back of the aggregate is delayed and braked by the one or more spring back resistors. Also disclosed is a spring back resistor and a vehicle seat provided with the safety spring aggregate.
