Abstract (en)
[origin: WO2016201494A1] The present disclosure relates to a height adjustable clothesline assembly and to components thereof. Certain embodiments of the present disclosure provide a height adjustable portable clothesline assembly comprising a frame for hanging clothes, at least two legs supporting the frame, the at least two legs comprising a strut comprising an upper section and a lower section which are laterally displaced, the lower section comprising a first slide fixedly connected to the lower section and having a sleeve to allow slidable movement of the upper section through the sleeve, and the upper section comprising a second slide fixedly connected to the upper section and having a sleeve to allow slidable movement of the lower section through the sleeve, and wherein movement of the upper section through the first slide and/or movement of the lower section through the second slide allows adjustment of the height of the frame of the portable clothesline assembly.
