Abstract (en)

[origin: WO2016202585A1] The invention relates to a container assembly, in particular of an air pressure system of a utility vehicle, comprising a first region and a second region, wherein the first region and the second region together enclose at least part of a container interior, wherein the first region and the second region are connected to each other by means of a joint region, and wherein the joint region is loaded in shear when the container interior side is loaded.
