Abstract (en)  
The present invention relates to a screening device (1) for separating waste, comprising a number of rotatable bodies which are spaced apart and arranged parallel to each other, wherein each body comprises a number of screen elements (3), which are spaced apart and arranged along said body, and a number of freely rotatable anti-clogging elements (4), each of which is provided between two adjacent screen elements (3), wherein said anti-clogging elements (4) are hook-shaped for attachment of the anti-clogging element (4) over the rotatable body.
