Abstract (en)  
[origin: EP3312357A1] A system for making an at least partially closed environment (such as a box or the like) using a plurality of panels is described, the system comprising: a lower plate, two or more panels and connection means for connecting said panels at the top, wherein said lower plate comprises a plurality of pin-like supporting and alignment members projecting upwardly, wherein at least a portion of said members is adjustable heightwise to compensate for different heights of the floor, each of said panels comprising a perimetral frame or a lower profile, wherein the perimetral frame or the lower profile comprises a cavity for accommodating the projecting portion of said pin-like supporting and alignment members.
