Abstract (en)

Embodiments of the present invention provide a data transmission method, device and system, and a computer storage medium. A network device receives a service request, the service request carrying a terminal identifier; determining, according to attribute information of the terminal corresponding to the terminal identifier, that a transmission mode for service data corresponding to the service request is a multiple Radio Access Technologies (RATs) data duplication transmission mode; and sending a response message to the service request, indicating transmission of the service data in the multiple RATs data duplication transmission mode.
