Abstract (en)

[origin: WO2016207763A1] A multilayer sheet material (10) is constituted by: - one or more aluminum layers (11, 11'), each having thickness equal or less than 10 µm, - one or more layers (12) of thermoplastic polymeric material having flexural stiffness included in the range of 294-1373 MPa, each having thickness equal or less than 5 µm. The aluminum layers (11, 11') and layers (12) of thermoplastic polymeric material are coupled alternately one to another and the multilayer sheet material (10) is embossed (13).
