Abstract (en)
[origin: WO2016207569A1] A facility forming a point of sale and that comprises a plurality of vendor stations and a computer access. Each vendor station is provided with a remote customer badge detector, arranged to address to the computer access, in case of detection, a customer identifier and an identifier of the detector, while the computer system responds by initiating a purchasing process at the vendor station where the detection has taken place.
