Abstract (en)

[origin: WO2017001762A1] The invention relates to a recording method implemented by a microcircuit (1), which method comprises: - receiving (B6), by said microcircuit, at least one transaction information item, and recording said at least one information item in a first memory of the microcircuit, the reception and recording steps being implemented in the course of a transaction, - detecting (B8) a transaction error, and - if an error is detected, recording (B9), in a second nonvolatile memory of the microcircuit, transaction data including the at least one transaction information item.
