Abstract (en)

[origin: EP3316251A1] A display controller (7) includes a noise detector (71) configured to detect noise components of a plurality of music pieces and a display control unit (72) configured to display a detection result of the noise detector (71) on a display unit (5). The display control unit (72) includes: a result display (721) configured to display the detection result of the noise components in association with time information of each of the plurality of music pieces; and a choice detector (722) configured to detect that a predetermined section of a first music piece of the plurality of music pieces is chosen; and a display changer (723) configured to change a display state of the detection result of at least one of the plurality of music pieces other than the first music piece according to the detection result of the noise components in the chosen section.
