Abstract (en)

[origin: WO2017005685A1] The invention relates to a security document (1) comprising a laminated document body (200) having a front side and a rear side, wherein the laminated document body (200) comprises at least two opaque material layers (9, 10, 201, 202) each having an inner side (205) and an outer side (206), wherein the inner sides (205) of the at least two opaque material layers (9, 10, 201, 202) face one another, and at least one transparent material layer (203) arranged between the at least two opaque material layers (9, 10, 201, 202), and wherein the at least two opaque material layers (9, 10, 201, 202) comprise perforations (12, 12'), wherein cross-sectional faces of the perforations (12, 12') on one plane of the material layers (9, 10, 201, 202, 203, 204) are not formed with rotational symmetry, and wherein further material layers (203) arranged between the at least two opaque material layers (9, 10, 201, 202) are all at least translucent, preferably all clear and transparent. The invention further relates to the corresponding method.
