Abstract (en)

[origin: WO2017001615A1] A container (100) for consumer articles, the container (100) comprising a box (20) comprising a box front wall (22), a box back wall, a box bottom wall, and first and second box side walls (24a, 24b); and a lid (40) comprising a lid front wall (42), a lid back wall, a lid top wall (46), and first and second lid side walls (44a, 44b). A lower edge of the lid back wall depends along a hinge line from a top edge of the box back wall, with the lid being moveable about the hinge line between an open position and a closed position, in which at least a portion of the lower edge of the first lid side wall (44a) abuts at least a portion of the upper edge of the first box side wall (24a), and in which at least a portion of the lower edge of the lid front wall (22) abuts at least a portion of the upper edge of the box front wall (42). The first box side wall (24a) is connected to the box front wall (22) by a first box edge portion (25), and the first lid side wall (44a) is connected to the lid front wall (42) by a first lid edge portion (45). The shape of the first lid edge portion (45) is different from the shape of the first box edge portion (25), such that, when the lid (40) is in the closed position, the lower edge (47) of the first lid edge portion (45) is disposed beyond the upper edge (27) of the first box edge portion (25) in a transverse direction of the container (100).
