Abstract (en)

[origin: WO2017001803A1] The present invention relates to a capsule (1), including a hollow body (2) made of a first plant material and designed to receive an infusible product (3) made of a second plant material, the body (2) comprising an opening (4) closed by a seal to contain the infusible product (3). The invention is characterized in that the capsule (1) comprises at least one divisible protuberance (6) protruding from the body (2) opposite the opening (4) and punchable by a machine intended to infuse the infusible product (3). The invention also relates to a method for manufacturing such a capsule (1) and to a method for implementing same.
