Abstract (en)

[origin: WO2017006022A1] The invention relates to a method for controlling a home-automation facility, the home-automation facility comprising a plurality of home-automation devices, and a plurality of central control units (U1, U2); the method being executed by a management unit (Sv) or by a mobile terminal (T) connected to the at least one home-automation facility and comprising the following steps: receiving (ECSv1) a control message (MC) originating from a user (Usr) or from a third-party application (A), or observing the fulfilment of a condition (Cnd) based on a time and/or a date, or indeed on a value of at least one state (S) variable (Cnd) of a home-automation device (D), the condition (Cnd) or the control message being associated with a request for execution of at least one control of a device; determining (ECSv2) at least one central control unit concerned by the control from the plurality of central control units; sending (ECSv3, ECSv4) at least one control message (MSScn1, MSScn2) to the at least one central control unit (U1, U2) determined in step ii of the home-automation facility with a view to executing the at least one control. The invention also relates to a method for configuring the facility.
