Abstract (en)  
[origin: WO2017001065A1] The invention relates to a thermostat (2) for heating, air-conditioning and/or ventilation systems, comprising a main part (4), a temperature sensor (18) arranged on the main part (4), an actuator (8) arranged on the main part (4), and a housing (6) that at least partially encloses the main part (4). In the region of the main part (4), the housing (6) is formed at least in parts from a translucent material, thereby providing a display.
