Abstract (en)

[origin: EP3318411A1] A fabric printing apparatus (100) includes a transport belt (23) configured to transport fabric (1) in a transport direction, a printing section (40) configured to perform printing by imparting ink droplets onto the fabric (1) having been transported, and a control section (80) configured to control positions for imparting the ink droplets, and based on displacement characteristic data indicating displacement amounts of the transport belt (23) that arise in a direction intersecting with the transport direction along with movements of the transport belt (23) in the transport direction, the control section (80) corrects the positions for imparting the ink droplets, in the direction intersecting with the transport direction.
