Abstract (en)

[origin: EP3318707A1] Disclosed is a lifting device having an automatic/manual switching structure and a smart window including the same . The lifting device allows a user to automatically open and close the smart window openable/closable in a lift sliding manner, and may also be switched to a manual mode, allowing the user to manually open and close the smart window. In addition, automatic opening/closing buttons are provided on the surface of a handle driving part, so that the user may open and close the window by simply manipulating the buttons.
