Abstract (en)

[origin: WO2017006190A1] The present invention concerns a mattress in foamy material (1) destined to an articulated support bed spring of the electric type and with the mattress that foresees a plurality of slots. In accordance with the invention, the slots develop in a direction that goes from a side of the mattress towards the opposite side in a manner that is substantially orthogonal to the plane of rotation of the articulated support bed spring where, in use, the mattress is destined to be applied.
