Abstract (en)

[origin: WO2017005389A1] The invention relates to a dishwasher (1), in particular a domestic dishwasher, comprising a washing container (2) for washing dishes, glasses, silverware, flatware, or similar items to be washed and comprising a means of a sorption drying device, particularly based on zeolite, which means takes up water in phases, wherein heated air containing water can be conducted into the washing container (2) through at least one blow-out opening (9) during at least a desorption phase of the means that takes up water. Said dishwasher is designed in such a way that the blow-out opening (9) can be cooled by means of a specially provided, in particular separate, application of coolant directed at the blow-out opening.
