Abstract (en)  
[origin: WO2017004649A1] The invention relates to a bending-tool store (4) for storing bending tools (2), comprising a plurality of guide rails (14) for holding and guiding bending tools (2), characterized by at least one first segment (11), in which the angular distances between adjacent guide rails (14) are at most as large as a first angle, and at least one second segment (12), in which the angular distances between adjacent guide rails (14) are at least as large as a second angle, wherein the second angle is greater than the first angle.
