Abstract (en)

[origin: WO2017009179A1] The present invention relates to a method for producing a packaging, wherein a film web is transported in a transport direction, in particular intermittently, and depressions are formed in the film web in a forming station, which depressions are filled with a material to be packaged and closed with a cover film and then are separated by at least one transverse cutter by means of a transverse cut, i.e., by means of a cut transverse to the transport direction of the film web. Furthermore, the present invention relates to a packaging machine and a transverse punch.
