Abstract (en)
[origin: WO2017005960A1] According to an example embodiment of the invention, there is provided a system for providing access to access restricted content to a user, the system including a communication arrangement operable to receive a content request message, the content request message including a content identifier, a processor configured to cause a first determination to be performed to yield a positive or a negative result, a validation module configured to, in response to the first determination yielding a positive result, obtain a first digital rights management key, the processor being further configured to cause a second determination to be performed to yield a positive or a negative result, and responsive to the first and second determinations yielding a positive result, the validation module is configured to cause access to the access restricted content to be provided to the user.
