Abstract (en)

[origin: WO2017036713A1] The invention relates to an active part unit (21) of a measurement transducer (1). The active part unit (21) comprises a measurement transducer core (33), a pressing frame (35), which lies at least against two opposite surfaces of the measurement transducer core (33), a winding tube (37), which surrounds a core segment (34) of the measurement transducer core (33) and bears at least one measurement transducer winding (39, 41), and at least one anti-rotation securing means (45), which comprises a curing mass (73), which connects the winding tube (37) to the pressing frame (35).
