Abstract (en)

[origin: JP2018079321A] PROBLEM TO BE SOLVED: To provide a needle thread cutter assembly for a two-needle sewing machine, the two-needle sewing machine comprising the needle thread cutter assembly, and a piping pocket sewing apparatus comprising the two-needle sewing machine. SOLUTION: A needle thread cutter assembly 9 for a two-needle sewing machine comprises cutter equipment 10 for cutting at least two needle threads which are each associated with stitch-forming components of one of two needles. Counter cutter equipment 11 for cutting the needle threads interacts with the cutter equipment 10. The cutter equipment 10 comprises two individual blades 12 and 13 for the respective needle threads. Cutter distance adjustment equipment 20 serves to predetermine a nominal distance A between the individual blades 12 and 13 in a transverse direction with respect to a sewing direction 19. The predetermined nominal distance A can be selected from at least two cutter distance values. As a result, there is provided the needle thread cutter assembly which can be flexibly used for various sewing tasks of the two-needle sewing machine. SELECTED DRAWING: Figure 2
