Abstract (en)
[origin: CN207919176U] The utility model relates to a vertical clothes hanger that dries in air with pillar (1), a plurality of arm (2) and foldable vertical support of bearing, bear the weight of the arm supports can be and can be strutted along slippery hitch (10) of pillar (1) motion on articulatedly to clothesline (3) are in bear and extend between the arm, vertical support has at least three ability folding supporting leg (4), the supporting leg articulates on supporting leg articulated elements (5) of pillar (1). The shortcoming that known vertical clothes hanger that dries in air has is for the umbrella -typepiece and the vertical support that hang the washes must divide each other to turn up the soil and is strutted, and this makes the operation complicated. The invention improves through following modeas to this, and vertical support has vaulting pole (9), the tip is fixed on supporting leg (4) articulatedly beyond the vaulting pole to be provided with the coupling device, the coupling device makes the motion of slippery hitch (10) and the motion coupling of vaulting pole (9).
