Abstract (en)

[origin: WO2017009028A1] The invention relates to a packaging (11; 31) comprising a cavity (12; 33) for accommodating at least one cleaning agent (13; 45) in the form of a bar, which can be produced by pouring a hot cleaning-agent mass into a mold, wherein the packaging (11; 31) has a microscopically roughened or structured surface at least in the region of the inner face (14) of the cavity (12; 33), which inner face serves as a contact surface for the cleaning agent (13; 45). The invention further relates to a production method, and to a packaging having cleaning agent.
