Abstract (en)
[origin: WO2017009639A1] A kerb ramp is described comprising a ramp body (12), a stop member (28) depending downwardly from the ramp body (12), an upper lip (20) secured to an upper edge part (16) of the ramp body (12) that, in use, is supported upon the kerb or footpath surface, and a lower lip (22) secured to a lower edge part (18) of the ramp body (12) that, in use, is supported upon the road surface, wherein the upper and lower lips (20, 22) are of a rubber or rubber-like plastics material and extend beneath the ramp body (12) to engage, respectively, the kerb or footpath surface and the road surface, and wherein the stop member (28) is engageable, in use, with an upright wall of the kerb.
