Abstract (en)

[origin: WO2017009412A1] The invention relates to claw (11), which makes it possible to apply loads of, for example, a curtain-type exterior façade to thermal insulation in an areally distributed manner without a thermal bridge. The claw has a mounting segment (13) and at least one load application segment (15), wherein the mounting segment and the load application segment include an angle (α) and wherein a front edge (17) of the load application segment has at least one tip (19).
