Abstract (en)

[origin: WO2017008971A1] The invention relates to a projection device (100) for data glasses. The projection device (100) comprises at least one light source (104) for emitting a light beam (106), and at least one holographic element (102) that is arranged, or can be arranged, on a lens of the data glasses for projecting an image onto a retina (110) of a user of the data glasses by deflecting and/or focusing the light beam (106) onto an eye lens (108) of the user.
