Abstract (en)
[origin: WO2017011596A1] The systems and methods discussed herein relate to securely transferring funds over a private network. Receiving transaction data related to a fund transfer including a tokenized financial instrument, providing to a sender financial institution the tokenized financial instrument to enable the sender financial institution to de-tokenize the tokenized financial instrument and identify an account of the sender, receiving a sender private identifier generated by the sender financial institution, providing to the sender financial institution the transfer amount of the fund transfer to enable the sender financial institution to transfer funds, providing a transaction identifier and a recipient private identifier to the recipient financial institution to enable the recipient financial institution to receive an ACH message from the sender financial institution over the ACH network, the ACH message indicating payment from the sender financial institution to the recipient financial institution to perform the fund transfer with funds over the ACH network.
