Abstract (en)
[origin: WO2017009159A1] The invention relates to a housing (1) for an electrical device, wherein at least one first portion of a lower outer wall (15) of the housing (1) is set back with respect to a second portion of the lower outer wall (10) of the housing (1) for forming a cooling channel (20) on the bottom side of the housing (1), and wherein a heat sink (70) of the electrical device can be arranged in the housing (1) adjacent to the cooling channel (20) such that heat given off by the heat sink (70) can be discharged by means of the cooling channel (20).
