Abstract (en)
The present invention relates to an abutment body (20) for attachment to a tool yoke (2) of a dismantling tool for use in pulling, pushing or separating components associated with drive shafts and/or wheel shafts, said abutment body (20) comprising a main portion (22) and two connecting portions (24), wherein each connecting portion having an elongated opening (38) extending along a common curved path. The present invention further relates to an improved dismantling tool comprising a tool yoke (2), two abutments bodies (20) and two pairs of securing bolts (46) for securing either one of said two abutment bodies to said tool yoke.
