Abstract (en)
[origin: EP3323736A1] It is disclosed a palletizer for stacking items on a pallet, comprising at least one gripping head, whose movement is controlled in the Cartesian space for picking a plurality of items (4a, 4b) from a production line and for placing them on a loading station (3) with vertical attitude, and also a strapping unit (1), arranged to wrap at least a strapping loop around at least two of said items (4a, 4b) arranged on said station (3), comprising at least one movable pressing member (10, 10'), integral to said strapping unit (1), provided with a pressing end (11) movable between a home position, outside the deposition area of said items, and an operative position, in which it exerts a pressure in the direction of a vertical side of said items (4a, 4b).
