Abstract (en)

The present invention is related to a container (10) with anti spillage device for collecting condensed water in a clothes dryer (1). The container (10) is configured to be removably associated with a housing (A) in a frame (2) of the clothes dryer (1) and comprises: an open upper aperture (11) for supplying condensed water into the container (10) and for draining the condensed water from the container (10); an anti-spillage device (12) protruding inside the container (10). The anti-spillage device (12) is placed at the open upper aperture (11) and it is provided with at least a wall (19A, 19B) delimiting through passages (14, 15, 16) for the water flowing in and out of said open upper aperture (11).
