Abstract (en)
The invention is in the field of low flow rate washing stations. A foam buffer (1) is provided that comprises an inlet (2) equipped for connecting the foam buffer (1) to a sink (30) of the washing station in a hydrological manner, an outlet (3) equipped for connecting the foam buffer (1) to a siphon (32) of the washing station in a hydrological manner, and a chamber (4) having a width (4.1) and a height (4.2), whereby the chamber (4) is arranged between the inlet (2) and the outlet (3), and the width (4.1) of the chamber (4) is larger than its height (4.2).
