Abstract (en)
[origin: WO2017016544A1] The invention relates to a hydraulic upper link for a three-point hydraulic lift, comprising a hydraulic system that includes a hydraulic piston and a hydraulic cylinder, the hydraulic piston being at least part of a lever arm of the upper link. It is essential that at the level of the annular space, at least one accumulator is connected at a certain preloading pressure to the hydraulic system via a hydraulic line.
